EXPERIENCES

Senior Software Quality Specialist
Booking.com | Amsterdam | Jan 19 - Present

- Daily prioritizing, planning and organising testing activities (test plan, requirements documentation, scenario creation, static analysis and execution of functional tests) in liaison with the QA team and the development teams.
- Prioritise, write and monitor UI tests using automation frameworks such as: NightwatchJS & in-house.
- Work as an advisory with 20+ teams to ensure new features are covered by tests & provide relevant guidelines.
- Identify opportunities for improvement and take ownership of tasks where possible.

Software Quality Specialist
Booking.com | Amsterdam | Oct 14 - Dec 18
- Ensured delivery of high-quality software through manual testing of A/B tests and features (functionality, user experience, regression, cross platform & browser). In agreement with the development teams, manually tested approximately 5 new features per day.
- Wrote and monitored (100+ tests) automated tests for prioritized guest facing features using Selenium IDE and transitioned to Nightwatch JS.
- Reported defects to development teams and follow up until resolution. Approx. 20% of bugs finds
- Shared feedback based on user experience to product teams.

Technical Coordinator, Projects & Implementation
Booking.com | Amsterdam | Jun 11 - Sep 14
- Provision of technical support for internal tools and customer service staff, prioritize & report bugs. Handled approximately 10 incoming inquiries per day.
- Assured quality of new internal by running manual test scenarios.
- Designed and facilitated training sessions for CS staff (approx 20 people)
